TECHNOLOGIES
Languages Python, Javascript, HTML5, CSS
Frameworks & Libraries Flask, Jinja2, jQuery, Bootstrap
Database & Industry Tools PostgreSQL, SQL, SQLAlchemy, Git, Github, Command Line

PROJECT
Trippy, November 2016   Live | Github
Stack: Python, Javascript, Flask, PostgreSQL**,** SQLAlchemy, bcrypt, Google Maps & Google Places APIs

Trippy is a travel management application that allows users to keep track of their past and future travel destinations by pinning cities on a map of the world. A user can add, edit or remove a pin. Color-coded pins help the user distinguish between a city a user has on their wish list, wants to visit again, or would rather not revisit. Trippy -- the app that gives globetrotters a high-level view of their travels.

WORK EXPERIENCE
InGenius Prep, Former Admissions Officer, May 2015-present
- Counsel students on building their candidacy and perfecting their applications to college

LaunchSquad, Public Relations Account Executive, August 2014-January 2016
- Planned and executed PR strategies for technology companies including Coursera, Guardtime, Vessel and TIBCO
- Built relationships with reporters and analysts; proactively secured stories in top publications
